

Name:Cecilia Lanza 100293886

complementary information

For the name of student, in this case if the student write more than 3 words. I just took the first and last words to make the loginId. If the student write just 1 word, the computer will put the last name equal the first name.

For addCourse, I used grade (a+, a, a-, b+, b, b-,c+, c, c-, d+,d, d-, f), so the user need put the string value. In the class I calculate the grade points multiply each value of the grade for each credit.
